Subject: NRC/DoD MOU Activities

John,

The U.S. Nuclear Regulatory Commission staff are beginning to plan for our annual site visits to some California sites being remediated by the Air Force and Navy. As you are aware, we have been conducting these site visits for the past many years as part of our "stay informed" approach for the Alameda, Hunters Point, and McClellan sites where we rely on EPA's regulatory oversight of the CERCLA remediation process used by the Air Force and Navy. We are now beginning our monitoring role under the MOU, and are planning on observing activities at Treasure Island, Long Beach, and Mare Island this year.

Would you be available during the week of October 15th (specifically the morning of October 16th) for NRC staff to meet with you to discuss these sites? Once we agree on a schedule, we can suggest an agenda for our meeting to focus our discussion.

Please let me know if you can support the schedule I have suggested or if you have a preference for certain times or days for our meeting. We are looking forward to working with you.

Regards,
Richard Chang
U.S. NRC
